Intuit Statement Regarding Tax Reform - November 2, 2017

Intuit is pleased Government is taking up tax reform and tax simplification, and moving toward Congressional consideration of this critical priority. We recognize that these issues will evolve as Congress works through the legislative process.

Intuit has long advocated for tax simplification for individuals, families, small businesses and the self-employed. Our mission to "Power Prosperity Around the World" demands that we champion a simpler tax code and common-sense tax reform that reduces the burden on American taxpayers and helps them improve their financial lives.
